

DCG Grotto Banquet

Update on the Great Savannah Cave System presented by Nick Socky

Happy Hour 7pm to 8pm Presentation begins at 8pm

This year's holiday banquet will occur on Saturday, December 4th. Once again, this year's banquet will be held on virtually on zoom. Yes, we understand Montgomery County just cancelled the indoor mask mandate, but preparations have not been made for an in-person banquet.

Nick Socky will be presenting on recent discoveries in the Great Savannah Cave System. This system is located in Greenbrier County West Virginia. This system has been a long-term project for many cavers, for many years. DC Grotto is very happy to have Nick provide us an update.

The Great Savannah Cave System is made up of several contact caves that are beginning or have been connected. In 2019, Maxwellton Sink Cave and McClung Cave were connected by a diver. Several other caves exist in the system that have not been connected – or have they? Please join us on Saturday, December 4th to find out what has been discovered.

Additional information, including the zoom links will be emailed in late November
